Description

The 5th generation Caddy Cargo is a new chapter for the Caddy range. It is more comfortable and capable than ever before thanks to Volkswagen's latest modular (MQB) platform. The sleek, aerodynamic looks, combined with a range of petrol and diesel engines give it improved efficiency, and the latest twin-dosing AdBlue technology ensures that the Caddy meets the latest emissions standards. New technology also provides the latest connectivity, with audio and navigation touch-screens up to 10 inch, with We Connect preparation. The Caddy Cargo's higher and wider load bay can handle larger loads and for the first time, Euro pallets can be loaded widthways into the rear load bay. The Caddy Cargo, for whatever comes next.
